This is a University of South Florida Center for 21st Century Teaching Excellence Blackboard Quick-start Tutorial

Getting or Modifying a USF netID

A USF netID is essential to access Blackboard at USF. If you need to get a USF netID or if you have a netID but do not remember the password, do the following:

1. Go to: <http://una.acomp.usf.edu>
2. Click the Activate your USF netID link if you have never created or used a netID before. You will need your USF ID Card for this. Once you create your netID, you will be able to log in to Blackboard within a day or two. Please note that it takes at least a day for you to be able to use your netID to log in to Blackboard after you have created and activated it.
3. Click the Reset your USF netID Password link if you have forgotten your USF netID password.
4. Follow the instructions on the respective web pages to complete the tasks.
5. Call 813-974-1222 if you have any questions about this process or trouble creating/activating a netID or resetting your password.
